Portfolio: joeyates.co.uk

Full UK driving licence & mobile

I am a self taught, qualified and passionate Web Developer with a spark and inspiration to grow and progress. I give 110% in absolutely everything I do, from start to finish. My passion is designing and constructing fresh new websites, as well as building user-friendly interfaces. I enjoy programming in HTML, CSS, PHP, MYSQL, and JavaScript. I am always seeking new challenges in order to expand my knowledge in all web-based areas.

My experience ranges from designing web icons to building large complex backend systems with integrated databases. I am therefore broadly experienced in web development and design. I have constructed several websites using WordPress as well as a few other major content management systems. However, I often prefer to completely immerse myself in coding and programming.

Employment History:

2016 – 2018: - Zync Solutions, Letchworth Garden City

I have spent c.two years at Zync as a Web Developer. During this time, I have worked on existing complex systems - both front end (HTML, CSS, jQuery) and back end (PHP, PostgreSQL). In addition, I have also played a large part in the development of “Zync Free Surveys” – a free survey tool accessible as both a website and an Android/iOS app. Due to this I have a generous knowledge of server-less systems of which operate with a Node.js backend. I’ve also had experience with Materialize, Bootstrap, Cordova, Grunt, Git, Rsync, Android Studio and Xcode – all used in the development of the website/app.

2012 - 2016: - Yellowstone Electronic Solutions, Luton

I have worked for Yellowstone as a part time Web & Graphic Developer for four c.years. Throughout this time, I have produced a variation of websites, databases, interfaces and graphics for multiple clients. In addition, I have had input in designing, building and maintaining the company website, using a wide range of programming languages and software.

2011: - Perfect Print, Dunstable

I spent a week’s work experience at Perfect Print, designing a number of graphics posters, business cards, letter heads, logos, etc.

Education:

2012 - July 2014: - Barnfield College, Luton
